Overall Satisfaction with Services

Program Satisfaction: Percent of responses to the question "How satisfied are you with the services you receive?"

Some of the key findings were:

- Overall, 81.3% of the individuals served by Comprehensive Psychiatric Services were "satisfied" or "very satisfied" with their services.
- The percent of individuals served in this region who rated themselves as "satisfied" or "very satisfied" was lower than the state average (78.4% for this region versus 81.3% for the state).
- The CPRC consumers were more satisfied than consumers in the other programs in this region (81.0% with at least a "satisfied" rating).
- The lowest satisfaction was in the Child Adolescent program, where 71.0% of those served gave a "satisfied" or "very satisfied" response.

Some of the key findings were:

- The participants in the Comprehensive Psychiatric Services programs were satisfied with the services they received. All statewide and regional ratings were above a 4.00 ("satisfied"). The ratings of this region ranged from 4.10 to 4.23.
- The highest rated items were confidentiality and respect of ethnic and cultural backgrounds (mean of 4.23).
- The lowest rated item was the content of the treatment plan (mean of 4.10).
- The CPRC Adult participants were the most satisfied with services (mean rating of 4.27).

Some of the key findings were:

- The quality of life ratings were significantly below the ratings of Comprehensive Psychiatric Services and service ratings.
- The consumers in this region were most satisfied with how safe they feel in their home (mean of 3.97) and least satisfied with amount of choices they have in their lives (mean of 3.44).

CPS Comparison of Gender

A comparison was made between the male and female consumers in the satisfaction survey items. Males were more satisfied with their general health care and what they do during their free time. Females were more satisfied with all other significant items. (See Table I-1).

CPS Comparison of Age Groups

A comparison was made among three age categories: (1) youth under the age of 18 years; (2) young adults between 18 and 49 years of age; and (3) adults 50 years of age or older. The adults aged 50 years or older were most satisfied with the knowledge of the staff. The adults between the ages of 18-49 were most satisfied following the treatment plan, the services received, and services being provided in a timely manner. (See Table I-3.)

CPS Comparison of Current Living Arrangements

A comparison was made of the survey responses based on the current living situation of the consumer. Those who identified themselves as having "Other" living arrangements were most satisfied with safety in the home/agency and neighborhood. Consumers who lived in a Group Home were most satisfied with how they spend their day, opportunities to make friends, their general health care, and what they do in their free time. Consumers who lived Independently were most satisfied with the remaining significant items. (See Table I-4).

CPS Comparison Between Those Who Lived and Did Not Live in Residential Treatment Facilities

A comparison was made on the satisfaction with services based on whether the individual had lived in a residential treatment facility during the past year. Consumers that had lived in a residential treatment facility were more satisfied with opportunities to make friends and what they do during their free time. Consumers that had not lived in a residential treatment facility were more satisfied with all other significant items. (See Table I-5).
